

Product designation

InspecS® 380/75/000-00

InspecS®**Product description, short**

Inspection cover for installation in synthetic impact-attenuating surfaces in accordance with DIN EN 1176-1:2017 and 1177.

Invitation to tender text

Inspection cover for installation in synthetic impact-attenuating surfaces. The inspection cover should securely cover the foundations of both vertical and diagonal playground equipment poles in accordance with the relevant regulations, and allow them to be temporarily exposed for the annual inspection. The requirements of DIN EN 1176-1:2017 and 1177:2018-03 must be fulfilled, particularly regarding the shock-absorbing properties. The latter must be certified by means of a corresponding inspection. The inspection cover should be undetachably installed through all stages of use.

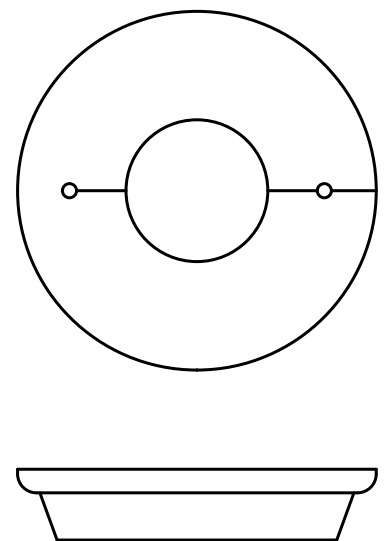

Our product range sheets offer further help to reliably define products.

General technical specifications

Dimensions	d = 380 x h = 75 mm / customized opening
Weight	approx. 1.200 g
Material	EPDM, PUR, PE, WNr. 1.4301
Surface	open-pored, water-permeable
Colour	24 different colours

Applied regulations, standards, reviews

DIN EN 1176-1:2017
DIN EN 1177:2018-03
HIC-testing
